

Individual treatment against Trichomoniasis in Pigeons

To consider:

- 1.- Disease caused by a flagellate that lives in the mucosa of the throat and the crop.
- 2.- It is a disease universally widespread in the pigeon lofts around the world.
- 3.- It causes many losses and poor results on flights.
- 4.- If not treated, it can give rise to other more serious diseases.
- 5.- Most of the time it occurs if appreciable symptoms; Sometimes yellow spots appear on the throat.

Necessary products:

- **Total Disinfection Solution**, to prevent the spread of the disease to other specimens of the loft and prevent the proliferation of other germs.

- **Dac Dazol**, for the control of trichomoniasis.

- **Prowins Probibac Caps**, to strengthen the immune system and accelerate recovery after treatment.
